

## Press release

Together into the future:

## Gruber Logistics and Universal Transport forge alliance for the future

Bolzano, Paderborn on 9<sup>th</sup> of August 2022 - The two logistics companies Gruber Logistics and Universal Transport are planning to join forces and become a leading player on the European market in the coming years.

A European alliance in the logistics sector is emerging: The traditional Italian company Gruber Logistics and the successful player Universal Transport from Germany are in advanced talks about a joint path for the future. The merger of the two successful companies by integrating Universal Transport into Gruber Logistics would be the first step on a major path of internationalization and growth and would create a new European market leader, especially in heavy- and specialized transport.

For customers of both companies, the future alliance should enable an even more attractive and comprehensive offer and bundle and thus expand the know-how of two successful providers. The highly specialized employees and management of both companies will continue to guarantee maximum reliability and precision for all customers.

The goal is to reach a final agreement between the owners by autumn and to obtain the approval of the antitrust authorities for the merger. The details of the joint project for the future will then be presented to the public.
